PROFILE

I'm a junior full-stack software engineer trained at Moringa School with a strong interest in building clean, user-friendly web applications. I enjoy working on the frontend, bringing designs to life with React and modern CSS, while also being comfortable working with backend technologies like Node.js, Flask, and Django. I'm a fast learner, curious by nature, and motivated to grow through real-world experience. Currently seeking an internship or junior developer role where I can learn, contribute, and improve my skills.

EDUCATION

1. Moringa School – Software Engineering Certificate
Graduated : November 14, 2025
